Imagine A School...

Where kids who love science and math are the cool kids.

Where every day is a field trip.

Where every student has a rigorous personalized learning plan.

Where every student is going to college.

Where every student can pursue his or her dreams.

That teaches – and models – a disciplined life.

Like this in Detroit, **tuition-free** and open to any student interested in science and math.

About Us

University Prep Science & Math (UPSM) schools are a brand new, first-class addition to the “90/90” charter school movement in Detroit. These schools graduate at least 90 percent of their students and send at least 90 percent on to college – no matter what it takes.

“We’re very pleased with the results, both the quality of instruction and the quality of things our son is learning. We’re looking forward to our daughter attending the school in a few years.”

– Judge Mark Randon

Curriculum

UPSM Middle School students receive a personalized, hands-on, project-based education in one of the most unique – and inspiring – learning environments in the country. The school is connected to the Detroit Science Center, where students interact with exhibits and science experts literally every day.

UPSM schools will offer your child a real-world perspective through partnerships – including internships – with such world-class businesses and institutions as the University of Michigan, the Detroit Symphony Orchestra, General Motors, the Detroit Medical Center and others.

A UPSM education will deliver the skills and experiences necessary to put your child on a path to competitive colleges and universities, and to the high-demand science, technology, engineering and mathematics (STEM) careers of the future.

How do you know if UPSM Middle School is the right choice?

If your child loves...

- Math and science
- Asking questions about the world
- Doing hands-on work
- Getting out of the traditional classroom to learn

If you want...

- To be a respected partner in your child's education
- An individualized learning plan for your child
- To ensure your child graduates from high school and goes to college

...UPSM will be a good fit.

What I like about UPSM is that each and every instructor cares about the children – and it shows. My daughter is definitely a reflection of the energy around her. I absolutely love the school.

– Chiketa Smith
